### **DETAILED ACTION**

1. This Office Action is in response to application filed on May 14, 1999. Claims 1-37 are presented for examination.

#### ***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-16 and 20-36 drawn to a method for optimizing the delivery of content data from a web server to a client device, classified in class 709, subclass 203.
  - II. Claims 17-19 drawn, a method for creating an electronic document, classified in class 715, subclass 500.
  - III. Claim 37 drawn to a system for demarcating optional content for transmission with "OPT" and "DOPT" tags, classified in class 715, subclass 513.
3. Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a method for optimizing the delivery of content data from a web server to a client device, whereas invention II has separate utility such as a method for creating an electronic document; and invention III has separate utility such as system for demarcating optional content for transmission with "OPT" and "DOPT" tags See MPEP § 806.05(d).

Art Unit: 2126

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II or III, restriction for examination purposes as indicated is proper.
